CargoM presented last Monday its 2023-2024 results to its members and partners in the logistics and freight transport sector at its annual general meeting.

“What a joy it is for us to present the Cluster’s projects this past year. We are proud of our results, despite the departure of key members of management at the end of the year. Our congratulations go to the team that masterfully managed to stay the course, managing the Cluster's day-to-day activities in addition to projects in development. By doing so, CargoM was able to continue its mission of uniting the sector in concerted action to improve supply chain fluidity. In line with our 2023-2025 strategic plan, a number of initiatives, some developed in partnership with other companies, have been implemented. These actions are making it possible to improve the performance, resilience and visibility of our major North American hub. We thank our members, partners, backers and directors for their loyalty and support throughout these major changes.
